SUMMARY

Full stack developer with a never ending passion to learn more development languages and technologies. A detail oriented, problem solver and team player always willing to try new or different ways to code. 1+ years of full stack development experience and currently pursuing a Full Stack Development Certificate from The Ohio State University.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, React.js, jQuery, Bootstrap, Node.js, Express.js, Sequelize.js, Git, MySQL, NoSQL, MongoDB, PWA, React.js

Applications: Visual Studio Code, GitHub, Heroku, Panic Nova, Terminal CLI, MongoDB Atlas

PROJECTS

Employee Directory

- A React.js app to allow the user to sort or search through a list of employee data.
- Using a few npm packages like axios, react-rounded-image, and gh-pages along with React.js.
- **GitHub Repo:** <https://github.com/Youngin9210/REACT-EmployeeDirectory>
- **Heroku Deployed App:** <https://youngin9210.github.io/REACT-EmployeeDirectory/>

Budget Tracker

- An PWA that allows users to track their budget on and offline using a service-worker, indexedDB, and MongoDB.
- Using Node.js, Express.js and MongoDB along with a few other technologies
- **GitHub Repo:** <https://github.com/Youngin9210/Budget-Tracker>
- **Heroku Deployed App:** <https://protected-stream-94143.herokuapp.com/>

Workout Tracker

- An app that tracks a user's workout session and shows statistics of workout sessions for the previous 7 days logged.
- Using Node.js, Express.js and MongoDB along with a few other technologies
- **GitHub Repo:** <https://github.com/Youngin9210/Workout-Tracker>
- **Heroku Deployed App:** <https://fierce-inlet-72161.herokuapp.com/>

Global Lost & Found

- Group project developed using Node.js, Express.js, and Sequelize, along with Handlebars, to create an app to help users around the world find lost items quickly and efficiently.
- Store data into a MySQL database using sequelize.
- **GitHub Repo:** <https://github.com/Youngin9210/Lost-Found>

- **Heroku Deployed App:** <https://glacial-fortress-45860.herokuapp.com/>

Tech-Blog

- An app created using Node.js, Express.js, Sequelize, Handlebars, and Bootstrap.
- Users login or signup to interact with blog posts using CRUD.
- **GitHub Repo:** <https://github.com/Youngin9210/Tech-Blog>
- **Heroku Deployed App:** <https://nameless-basin-78183.herokuapp.com/>
